DRINKING WATER ADVISORY

This boil water advisory is a precaution

Due to loss of water pressure in the distribution system on DATE, potentially harmful bacteria could be present in the water supply. This advisory does not mean the water is contaminated, but rather that it could be contaminated. The affected area is limited, but if you have received this notice directly, you are in the affected area. Avion is in the process of confirming that the water is free of contaminants through laboratory testing. The test results will take a minimum of 24 hours. Because the water quality has not yet been confirmed and contaminated water could make you sick, customers should assume the water is unsafe and take appropriate precautions.

Do not drink the water without boiling it first.

Customers should bring water to a rolling boil for 1 full minute, allow the water to cool before using, and store the cooled water in a clean container with a cover. Customers should use boiled water that has cooled or bottled water for:

- * Drinking
- * Brushing teeth
- * Washing fruits and vegetables
- * Preparing food and baby formula
- * Making ice
- * Cleaning food contact surfaces

We will inform you when tests show no bacteria and the boil water notice has been lifted. We anticipate resolving the problem within 24 to 36 hours.

For more information, go to avionwater.com or contact our office at Avion Water, 541-382-5342 or avion@avionwater.com. General guidelines on ways to lessen the risk of infection by contaminants in drinking water are available from the EPA Safe Drinking Water Hotline at 1-800-426-4791 or the Oregon Health Authority, Drinking Water Services at 971-673-0405.
